DETAILED ACTION

1. Claims 1 – 20 are presented for the examination.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 24 November 2003 was filed before the mailing date of the first office action. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

3. Claims 1 – 20 are allowed.

Reasons For Allowance

4. The following is an examiner's statement of reasons for allowance: Applicant's claimed invention distinguishes over the prior art for following reasons.

The independent claim 1, is allowable over the art of record and none of the references either alone or in combination fails to teach or fairly suggest or render obvious an integrated circuit for connecting a shared communication bus including means for receiving a set of data signals, and a skew compensation circuit including a first and second set of data delay blocks and configured to select and to insert a first and second set of delay blocks depending upon first and second device connected to the shared communication bus as described in claimed invention.

The independent claim 8, is allowable over the art of record and none of the references either alone or in combination fails to teach or fairly suggest or render obvious a data processing system including first, second and third agents connected via shared bus, including a third agent configured to receive information via shared bus, and

a skew compensation circuit enabled to identify first or second agent as sender of information and to alter skew compensation based on the identity of sender by adding appropriate delay specific to corresponding sender as described in claimed invention.

The independent claim 16, is allowable over the art of record and none of the references either alone or in combination fails to teach or fairly suggest or render obvious skew compensation circuit for connecting for a shared communication bus including a first and second set of data delay blocks corresponding to each of data signals of a shared communication bus and each data delay block is configured to insert a variable amount of time delay into signal path of delay block's corresponding data signal and multiplexer configured to select between first and second set of data delay blocks as described in claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nitin C. Patel whose telephone number is 571-272-3675. The examiner can normally be reached on 6:45 am - 5:15 pm.
